

Completion Information

- You will see on page two of this document a schedule that provides lenders with information on your experience in completing property projects.
- Lenders place a great deal of the decision on an applicant's experience, so this document is very important in gaining successful credit approval.
- The first line is an example - please type over with your own information.

Please note: Lenders will randomly verify purchase prices and sold price data against the land registry, so this information needs to be accurate.

Summary of Past Property Developments and/or Refurbishment Projects
